

MySelf

I was born as a small baby.
I looked different when I was a baby.
Paste a photograph of yourself when you were a baby.

A large, empty rectangular box with rounded corners, intended for pasting a photograph of the child as a baby.

Paste your recent photograph in this box.

A large, empty rectangular box with rounded corners, intended for pasting a recent photograph of the child.

How have you changed from what you were as a baby?

Different parts of our body also grow as we grow older.

Look at the pictures and see how we grow :

Each year you grow a little. As you grow, you become stronger and taller. The shape of your body changes.

New born babies have no teeth. But when they reach the age of 3 years, they have 28 teeth.

A baby cannot do anything himself.

His parents help him to do all the daily activities. But as the time passes, he starts growing up. He starts to sit and walk himself. Also, he starts to eat himself.

After childhood, a baby becomes a young boy. He can do all activities on his own.

After his young age, he becomes an adult. Now he can share his responsibilities with his family members.

In an old age, everybody becomes weak and slow.
